

AMAR YASSER MOHAMED SAYED

Junior DevOps Engineer

Cairo, Egypt | +20 1552694437 | amaryasser046@gmail.com | linkedin.com/in/amar-yasser13 | github.com/alpha9898

PROFESSIONAL SUMMARY

Junior DevOps Engineer at VPSie with hands-on production experience administering Linux environments, CI/CD pipelines (Jenkins, GitHub Actions), and containerized workloads on Docker and Kubernetes. Built and shipped full-stack DevOps tools end to end (TopoForge, OpsLens AI, InfraDoc AI). Skilled in Terraform, Ansible, Python (FastAPI), and the Prometheus-Grafana-Loki observability stack. Currently pursuing AWS Certified Solutions Architect - Associate (SAA-C03).

SKILLS

- **Operating Systems & Scripting:** Linux (system administration, troubleshooting), Bash Scripting, Python (FastAPI, automation)
- **Containers & Orchestration:** Docker, Docker Compose, Kubernetes, Helm
- **CI/CD & Version Control:** Git, GitHub, GitHub Actions, GitLab, Jenkins
- **Infrastructure & Cloud:** Terraform (Infrastructure as Code), Ansible (Playbooks, server configuration), Proxmox, AWS (EC2, CloudWatch, IAM, STS, S3)
- **Monitoring & Observability:** Prometheus, Grafana, Loki (metrics, logs, dashboards, alerting)
- **Databases & Distributed Systems:** PostgreSQL, MongoDB Cluster, etcd Cluster
- **Soft Skills:** Problem-Solving, Troubleshooting Under Pressure, Cross-Functional Collaboration, Communication, Technical Documentation, Ownership, Continuous Learning, Adaptability

PROFESSIONAL EXPERIENCE

Junior DevOps Engineer - VPSie EG | 08/2025 - Present

Promoted from DevOps Intern to full-time Junior DevOps Engineer in 04/2026

- Built TopoForge (github.com/alpha9898/topoforge), a full-stack app (FastAPI, Next.js) that converts Low-Level Design (LLD) Excel/CSV data into editable High-Level Design (HLD) Draw.io diagrams, reducing design time by 85% (from ~3 hours to ~30 minutes per diagram).
- Executed a 21-step production platform deployment across 18 VMs using Proxmox, Percona XtraDB Cluster, HAProxy, and Helm.
- Deployed and operated containerized applications on Docker and Kubernetes across production Linux environments.
- Maintained CI/CD pipelines (GitHub Actions, Jenkins) and automated infrastructure with Ansible and Terraform.
- Implemented monitoring and logging with Prometheus, Grafana, and Loki to improve observability and reliability.

PROJECTS

OpsLens AI - AI-Powered AWS Incident Detection & Account Health

github.com/alpha9898/opslens-ai | Live: opslens-ai-tau.vercel.app

- Multi-tenant SaaS (FastAPI, Next.js, PostgreSQL/Supabase) that connects to AWS via IAM Role + STS AssumeRole, analyzes CloudWatch logs, and generates AI incident reports with root cause and suggested fixes.
- Added AWS account-health audits (security, unused resources, right-sizing via Compute Optimizer) with deterministic rule packs and finding deduplication; deployed serverless on Vercel.

InfraDoc AI - Automated Infrastructure Documentation & IaC Security

github.com/alpha9898/infradoc | Live: infradoc.vercel.app

- Parses Terraform, CloudFormation, Kubernetes, Helm, and Docker configs from any GitHub repo (Next.js, TypeScript, Supabase) and auto-generates documentation, architecture diagrams, runbooks, and a service catalog.
- Implemented 25 IaC security rules with a 0-100 score, scan-to-scan drift detection, dependency graphs with SPOF detection, and cost estimates; 18 modules live in production.

EDUCATION

Bachelor's Degree in Software Engineering - Egyptian E-Learning University (EELU), Egypt | 2025

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate (SAA-C03) - In Progress, expected 2026
- IT Specialist - Device Configuration and Management
- Data Structures and Algorithms
- Java Programming and Software Engineering Fundamentals

LANGUAGES

Arabic - Native | English - Professional Proficiency
